Flow – Order to cash

This presentation will cover; **how to conserve cash:**

- 'Slash' lead-times **days**, not **weeks**.
- 'Slash' WIP. Use 'Pull' not 'Push' for production.
- 'Live' schedule. Focus on 'today' by WorkCentre.
- Measure **on-time in full deliveries**- **No excuse** on payment.
- Reduce 'waste', **last resort** add people. **Intense** focus on **daily** improvements.

Reducing WIP Example :-

Sales £50k/week.

4 wks Lead-time WIP £160k (80%)

2 wks Lead-time WIP £80k.

1 wk Lead-time WIP £40k.

- Critical link between orders and the Shop-floor providing one 'Live' schedule.
- Real-time information reducing 'waste' in movement, rejects and skills
- Scheduling of delivery dates happens instantaneously across the factory
- Reporting & Dashboards provides live analysis to assist Kaizen projects
- It engages at all levels of the business and KPI's show 'live' results.

Recent case study

Before implementing production system :

- Long established manufacturing company approx. 30 people.
- Challenges with on-time delivery, excessive overtime and reducing margins.
- Struggling to find a system which 'worked' for their business.

Covid-19

Customer Results

Before production system:

- Lead-time 4-5wks.
- Output 250sqm/week
- Continuous overtime
- 60% on time.

After production system:

- Halved lead-time 2 weeks.
- Output increased by 75%++
- Managed overtime
- Initial savings ~£350k/year.

Don't Automate Waste

1. Get the business process right.
2. Reduce the waste.
3. Provide the right information using the right systems.

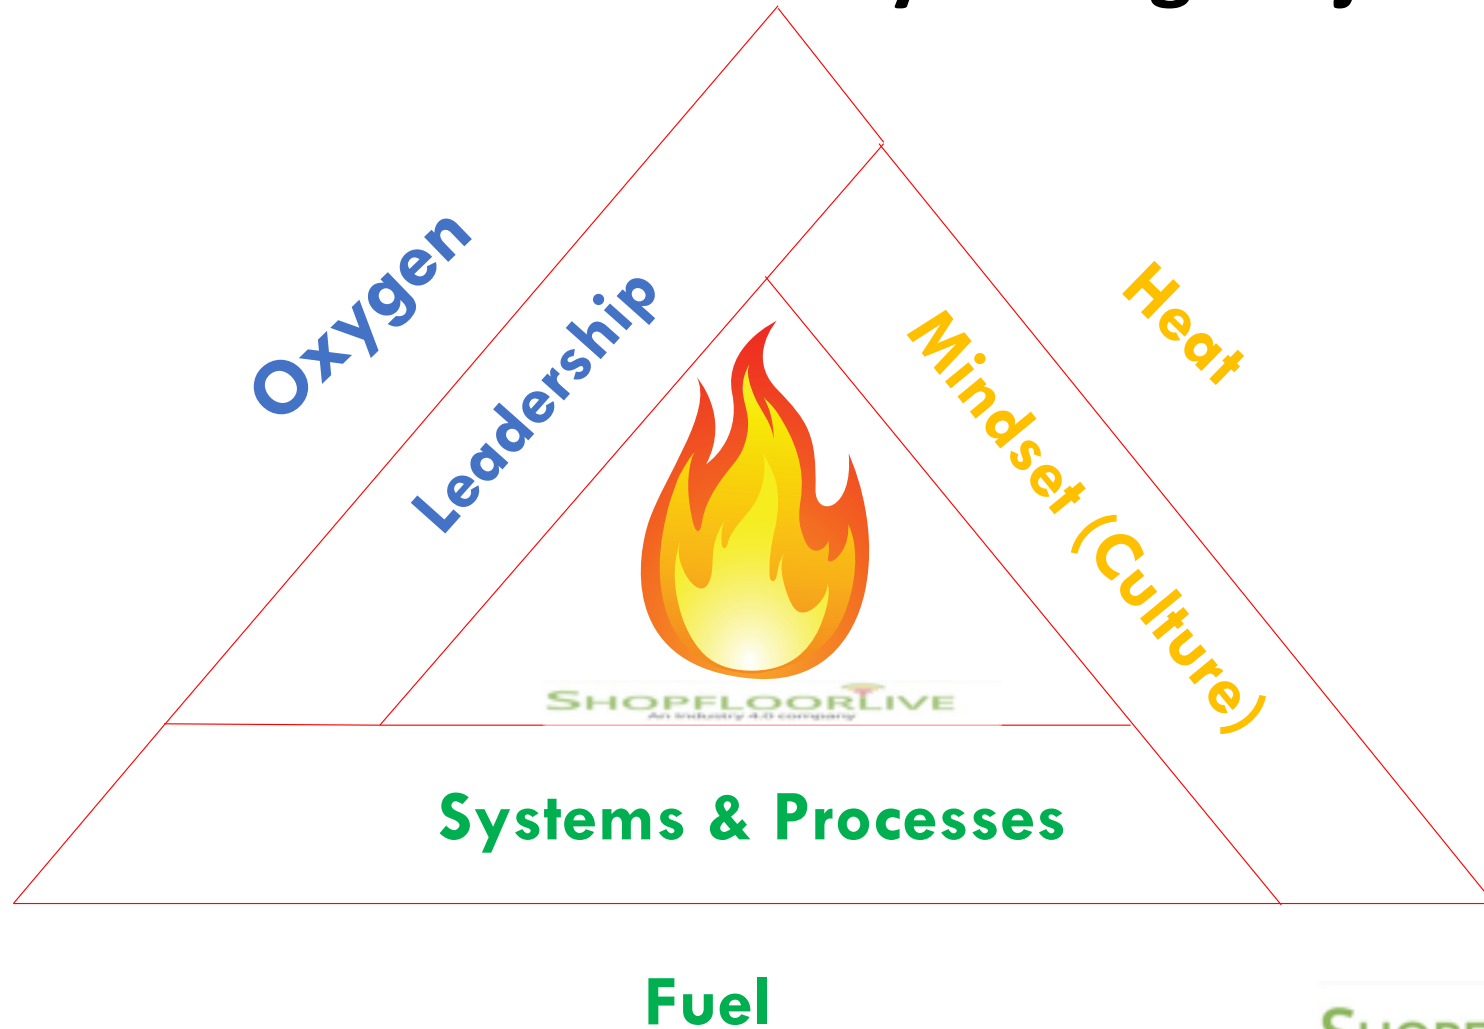

"A Bad Process will Beat Any System"

From this case study, they found success by:

- ✓ Highly committed leadership team
- ✓ Support from Operational Excellence Team at investNI
- ✓ ShopFloorLive – 'Live' production system

What it takes for success on your digital journey

2.0 Manufacturing Systems

The image is a composite of two photographs. The left half shows a warehouse interior with tall metal shelving units filled with cardboard boxes. A worker in an orange safety vest and dark clothing is walking away from the camera down a central aisle. The right half shows a factory interior with large industrial machinery, including a conveyor belt and a large metal pipe system. A worker in a green shirt and white gloves is handling a stack of light-colored wooden panels on a red metal stand. In the center, a white diamond-shaped overlay contains the text "What Type Of Business Are You In?".

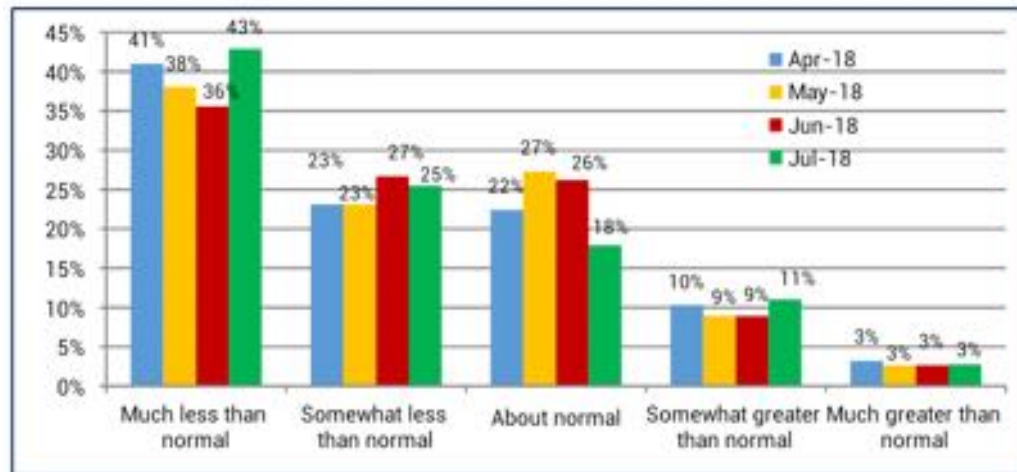

**What Type Of
Business Are You In?**

Distribution company

Are you making
money?

Profit Margins - % response

- What you buy is what you sell....
- Ability to perform analysis and data-cost vs sell etc..

Manufacturing company

Are you making
money on this
product or
customer or
order?

Manufacturing Company

Not sure? Must consider ...

Overtime?

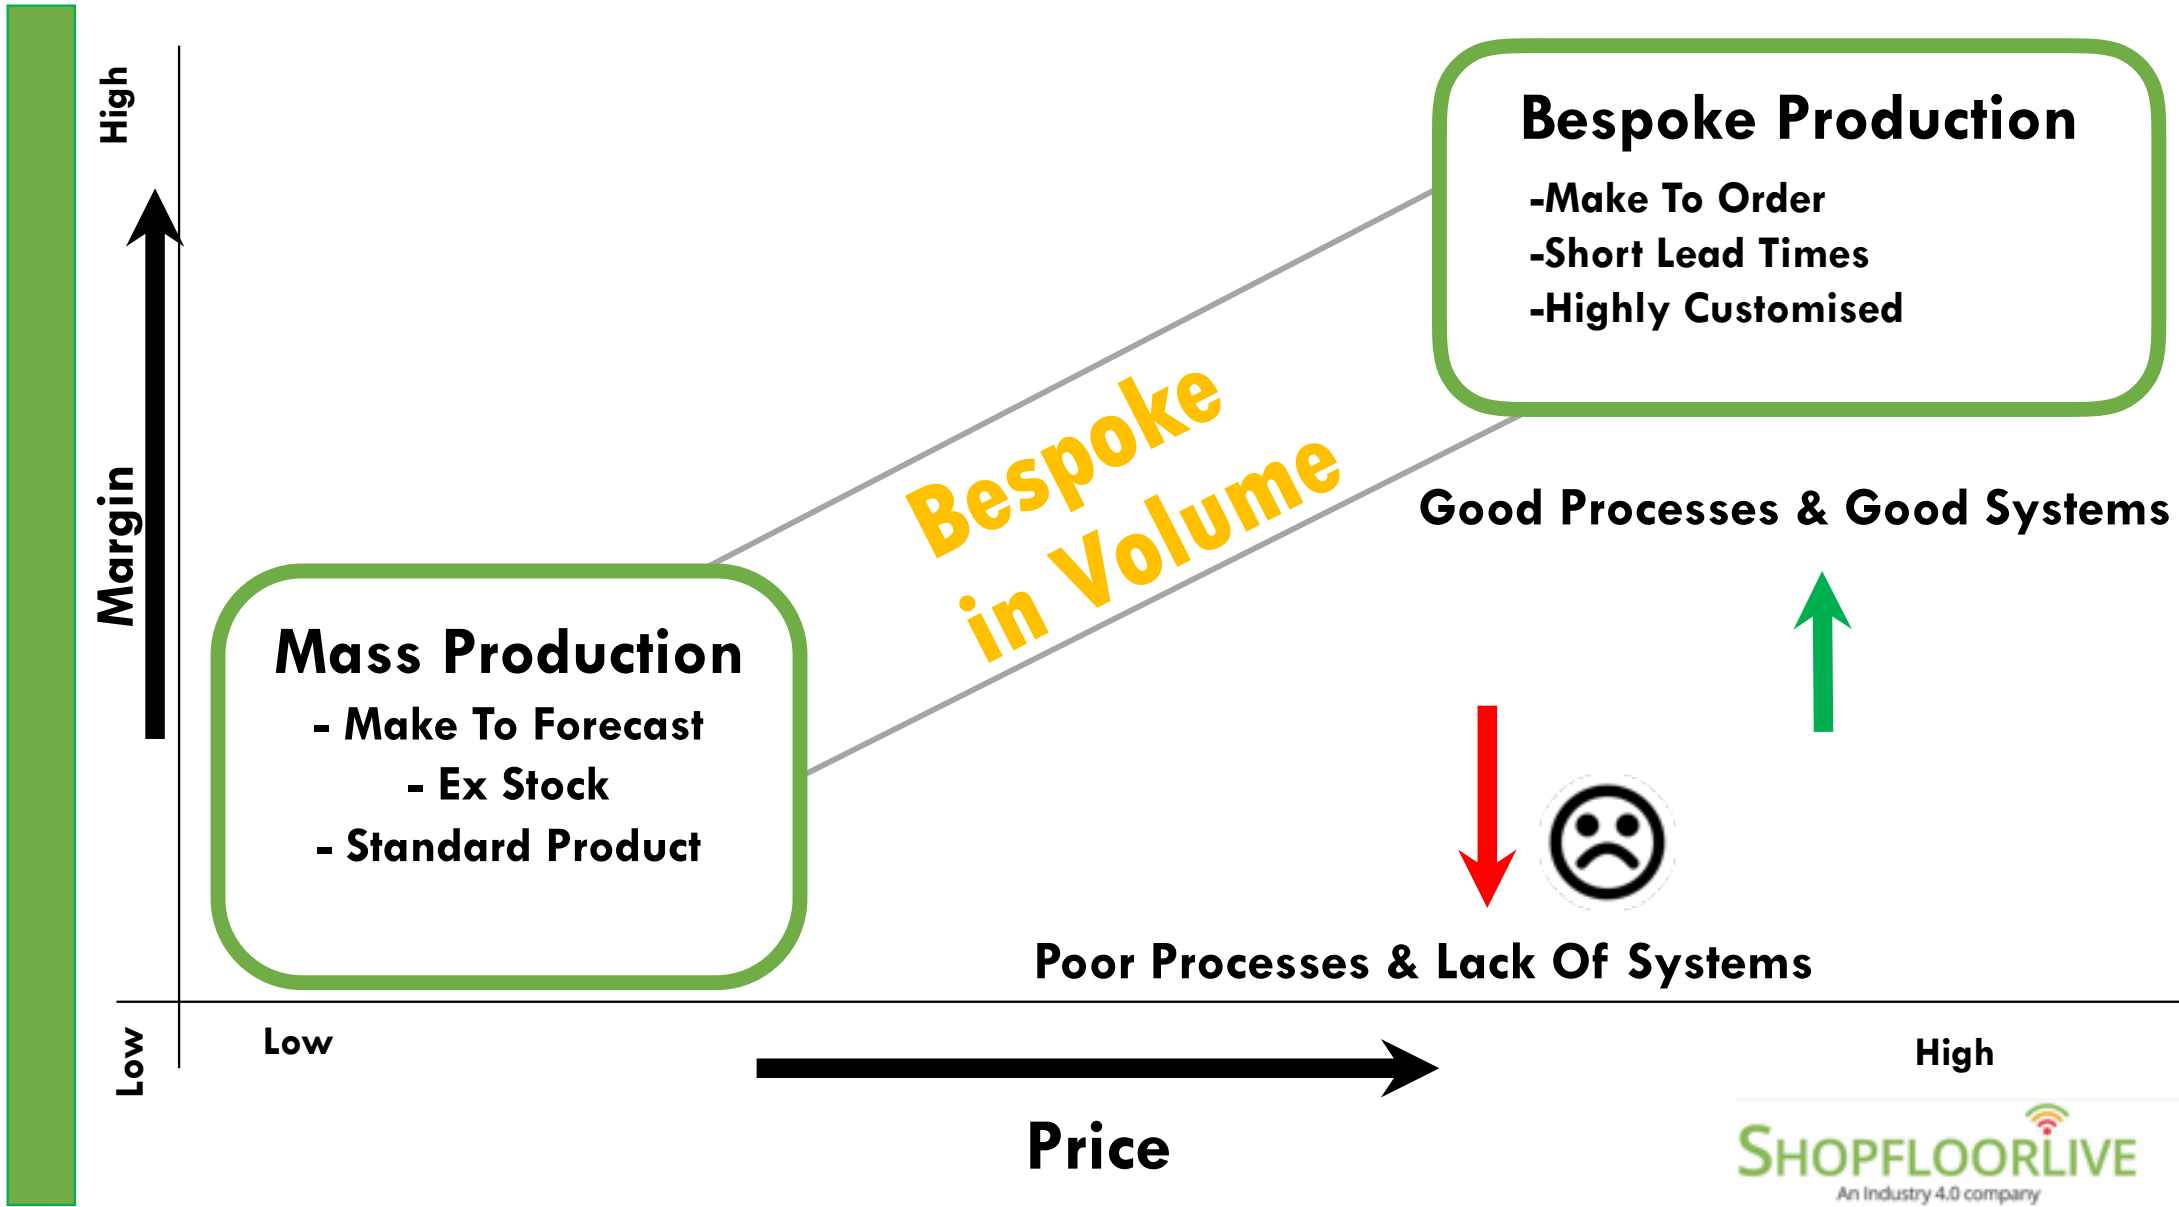

Scrap?

Waste?

Delivery Costs?

Late Deliveries?
